

What is new in Norden Lab Professional - Bioscreen C Edition 1.1  
Release 6

Version 1.1 Release 6

This is a maintenance release.

What is new:

1. One bug fix (symptom: when wells have been selected and custom graph view wells selected, then well selection changed, the custom graph view well where not cleared, leading to invalid well selection ) .
2. New feature: In the workshop all measurements now show also the temperatures of cassette and cover for each record.
